

Follow Ford-Fulkerson's algorithm to find a maximum flow for the following network.

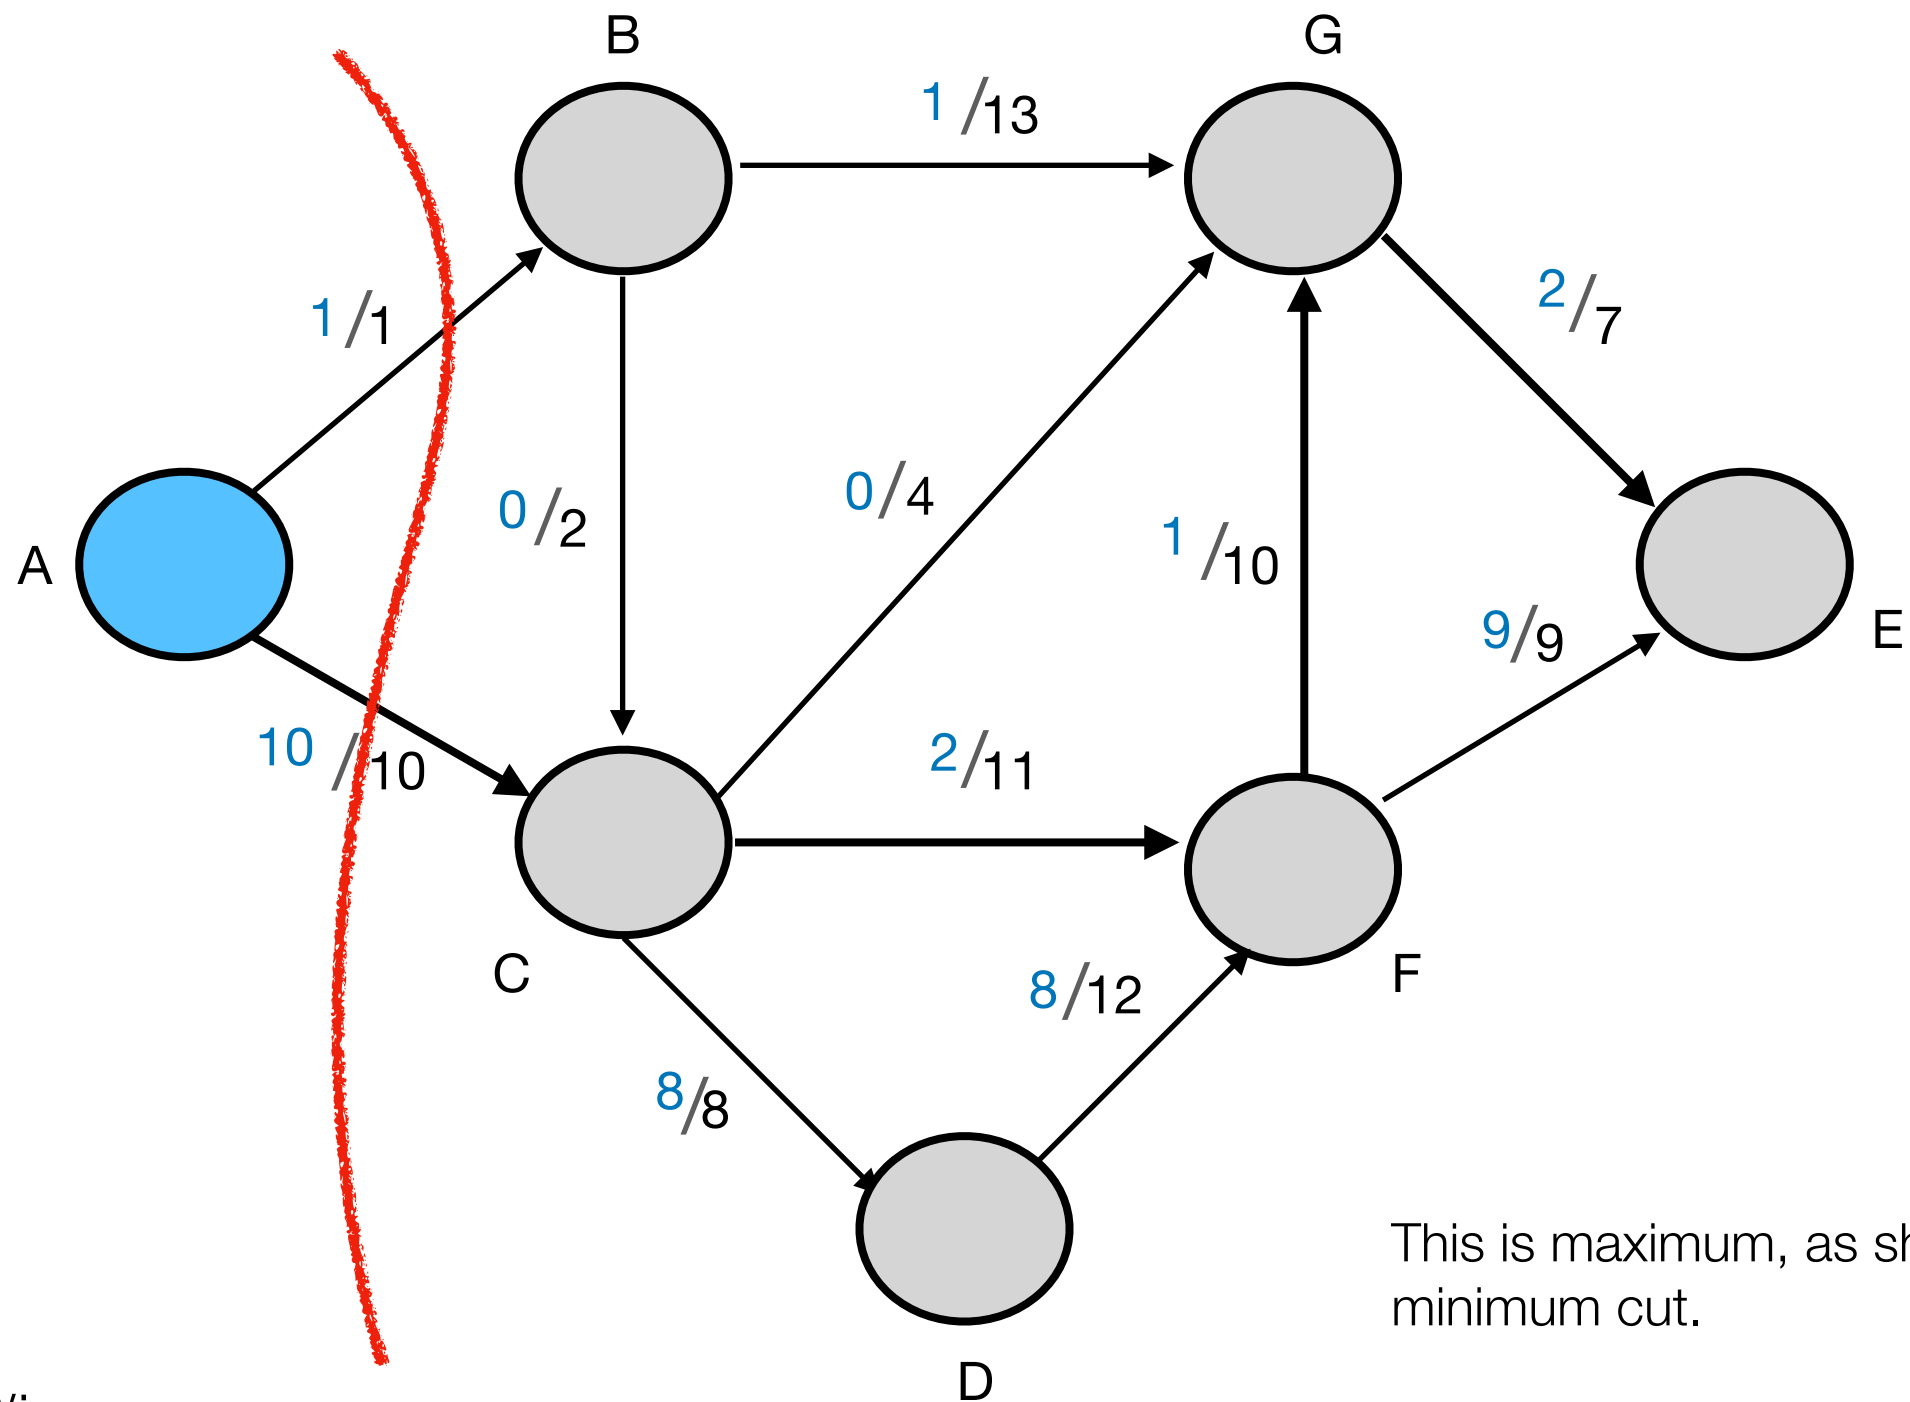

Current flow:  
 $|f| = 11$

Find an augmenting path with DFS  
from the source to the sink

Increase flow along the path by the  
residual capacity of the path (smallest  
residual capacity of any edge)

Follow Ford-Fulkerson's algorithm to find a maximum flow for the following network.

Current flow:  
 $|f| = 11$

This is maximum, as shown by  
minimum cut.
